

264

The Ademco 264 Money Clip is designed for installation in cash registers, cash boxes and at tellers' windows. Two bills are placed under the clip section of the switch. Additional bills in the cash drawer are placed on top of these bills. Bills may be removed in a normal manner as long as the bottom two bills are not removed from the money clip. When the bottom bills are removed, a highly developed switch mechanism insures positive, yet quiet response, sending an

immediate signal to either the police or central office. The 64 Retractable Door Cord is recommended for connecting the 264 Money Clip into the protective hold-up circuit.

How to Order:

Money Clip

264

Single-pole double-throw contacts. Recessed screw holes are provided for easy mounting.

Retractable Door Cord 64WH

Stretch cord to connect to 264 into moving cash drawers, white.
