Honeywell’s feature-rich 6280 Color Graphic Voice Touchscreen Keypad family gives you the opportunity to close more sales, increase retention and capture new markets.* They feature a high-resolution 7” widescreen TFT display that doubles as a digital picture frame. There is a choice of silver and white color schemes, three language options and voice annunciation of alarm conditions.

The intuitive user interface features icons and menus that make system operation easy to navigate—helping to reduce end-user training and costly false alarms. The SD card slot allows the end-user to update to the latest 6280 software features and benefits without the dealer having to do a costly site visit.

The digital picture frame and video viewer features let end-users create slideshows and view home movies on the brilliant, high resolution TFT display. Homeowners can customize the slideshow with family photos, vacation pictures and more.

The choice of two color housings and three languages (ideal for homes with multilingual members) opens up new opportunities and markets that previously were untapped. Silver blends perfectly in stainless steel kitchens and garages. White, a popular classic choice, blends seamlessly with lighter décors.

To help you close more sales, Honeywell has created a handheld demo (6280WHD) that includes a sales infomercial video that highlights the features and end-user benefits of the 6280. The video can be played by simply pressing a button.
