

QND88200

QUICKNETWORK DISTRIBUTION PANEL

The QuickNetwork QND88200 distribution panel is one of the most economical Honeywell distribution panels. Providing distribution of voice, data and video, the QND88200 comes standard with:

- Install can and cover
- Distribution of one incoming video signal to eight locations
- Built-in 15dB bi-directional amplifier
- Two pass through connectors for Satellite TV distribution
- Distribution of four incoming telephone lines to eight locations (RJ45)
- RJ31X port
- 110v power outlet

The QND88200 is the perfect entry level distribution panel. While providing distribution of voice, data and amplified video signals, the QND88200 also accepts a wide variety of upgrade modules, allowing customers to customize this panel to their exact needs. With the QND88200 panel, installers and builders have an easy to use, flexible, and inexpensive solution for wire management and signal distribution.

FEATURES

In its basic configuration, the QND88200 distribution panel provides distribution and control of voice, data and amplifies video signals. With the addition of optional modules, the QND88200 can also provide distribution and control of security, audio, computer networks, home automation, control products, IR products, RF products and wireless products.
