July 30, 2003

Dear Customer:

As part of the continual process to upgrade the IntelliSense product offering, we are transitioning 2 products to newer models. The transitions bring upgraded feature sets to the product line, while minimizing the confusion of which product to use.

Old product	New Product
MC760	IS2260
MC760T	IS2260T
IS150	IS215T

The IS2260 family of PIR's has more sensitivity levels, Silent relay operation, Advanced Temperature compensation for improved elevated temperature operation, increased pet immunity (40 lbs), and ultra low current consumption (<4 mAmps).

The IS215T PIR is a field proven reliable design, which includes an updated look, case tamper and is more aggressively priced when compared to the IS150.

The IntelliSense wall mounted PIR product line looks like this:

IS215T – 40x40 foot, base model

IS2260 – 60x120 foot, 40 lbs pet immune unit

Please do not hesitate to contact me if you have any further questions at 1-800-645-7568, extension 1323.

Sincerely,

Thomas Babich
Ademco/IntelliSense Product Manager
