

MDAD86

AUDIO DISTRIBUTION MODULE
FOR QUICKNETWORK PANELS

The MDAD86 provides amplified distributed audio for the home or office. With built-in impedance matching, the MDAD86 will work with most any 100 watt stereo amplifier, in conjunction with standard audio cabling.

FEATURES

Allows amplified audio signal to be distributed to eight stereo or 16 mono locations.

Typically installed with volume control (attenuator) such as AUD75VC or AUD75VCA to provide convenient in-room adjustable volume control for listening pleasure.

SPECIFICATIONS

- Module Size
 - 6" (takes up one expansion bay)
- Weight
 - 1.5 lbs (0.7 kg)
- Mounting
 - The module mounts in all QuickNetwork panels.
- Power Handling
 - 125 watts per channel
- Wire
 - Up to eight pairs of 16AWG
- Protection
 - Automatic load protection
