Turn Your House into a Smart Home

With your Honeywell security system, you have the power to transform your house into the most convenient, comfortable, and cost-efficient space you’ve ever lived in. Imagine monitoring and managing your entire home, from your locks to your lights and more, with the tap of an app. It’s the simplest way to be in total control of what matters most – your home and everyone in it.

Get Automated to Get Acclimated

Settle in to the new place with easy-to-use, automated technology for a home that’s exactly how you like it – day and night, home or away. Whether you start small or dream big, you’ll enjoy the streamlined lifestyle that your smart home provides.

Set Your Scene for a Simpler Life

Make your life simpler and less stressful with “scenes.” Scenes enable multiple parts of your home to work together in perfect harmony and to your exact specifications for on-demand comfort. From game time to homework time, there’s a scene for any time. For example, as you get in bed at night, activate the “bedtime” scene and your alarm system secures your home, locks your doors, and turns off your lights with a single touch. You can rest assured knowing that your house – and your family – are secure all night long without getting out of bed.

Honeywell Total Connect® Remote Services

Peace of mind travels with you thanks to Honeywell Total Connect. It keeps you connected to your home anytime, anywhere, on your iPhone®, iPad®, PC, or Android™ device. Always know when your child gets home safe from school, if your pet is causing trouble, and so much more with mobile alerts and notifications.

1. Security
   
   We know security and how important it is to you and your family. Remotely arm, disarm, and check the status of your security system, lock and unlock your doors, and control who comes and goes with a single touch. And remember, you can always rely on your 24/7 monitoring station that summons first responders.

2. Water Damage Protection
   
   Water incidents such as leaks or floods can happen with little warning. Advanced water detection sensors alert you to such events and can even shut off your main water valve before damage gets extensive – and expensive.

3. Video Monitoring
   
   Live video makes keeping an eye on your home that much easier. From package deliveries to surveillance events, baby monitoring to checking in on your pet, real-time video and event notifications give you the confidence of knowing that everything’s okay at home.
Location Awareness
As a new homeowner, you understand that location is key. With geofencing, your smartphone makes it easy to ensure your most important assets, like your car or home, are secure from near or far.

Fire and Carbon Monoxide Safety
A local alarm sounds in your home to notify you of a fire or carbon monoxide event, but what happens when you’re not there to hear it? Just like our security services, with monitored fire and carbon monoxide detection, you get advanced protection backed by professionals who can summon help to minimize damage.

Lighting
Smart lighting is more than just turning indoor and outdoor lights on or off. Make your house appear occupied when you’re out of town for added security, light a path as you approach home for a safe arrival, or set the perfect ambiance for family movie night with the tap of an app.

Simple Steps to a Smarter Home
Don’t put your smart home on hold — call your security professional today to get started. Be sure to ask about insurance discounts you may qualify for.

Comfort and Energy Efficiency
Every homeowner likes saving money, but it shouldn’t come at the price of discomfort. Enjoy personalized temperatures while you’re home and automatic energy savings while you’re away.
Simply Smart
It’s easy to make your home safer and smarter so everyday life is simpler. We provide you and your family with peace of mind and a true connected home experience that suits your lifestyle.

Resideo, with technologies in more than 150 million homes worldwide, provides homeowners the tools to stay in control through the convenience of their mobile devices. Connected thermostats, home controls, fire and security systems, and air and water purification are among the many products that provide homes around the world greater comfort and safety.
