WORKS OVER WI-FI®
OR CELLULAR

Optional Feature To Ensure Proper
Response Personnel Are Dispatched

APL

ADVANCED PROTECTION LOGIC™

Protect Against "Smash and Grab"

A signal can be sent to the central station (via
AlarmNet®) even if an intruder attempts to destroy or
disable the control panel in a "smash and grab" attack.

*Additional equipment required. Not compatible with certain garage doors and garage door openers. Garage door control must have working entrapment protection.
