

COMING SOON: AlarmNet 360, Now with Smart User Management

An Efficient Process for a More Productive Business

Easily control access levels of your employees in AlarmNet 360™ with our new user management process. It enables you to add new users and edit user information with a few, simple clicks. Now you can streamline user setup by choosing from pre-existing roles and groups, or create custom categories as needed.

Simplified User Setup and Control

- Less information is required for setup so adding new users is faster than ever before
- Assign new user features and account access with one click
- Create roles for existing users with similar functions to increase efficiency
- Easily disable existing users and remove access as needed
- Easily assign specific account access for each group at your discretion
