

VISTA® Partition Support

Increase Attach Rates and Elevate Conversions

Honeywell Total Connect Partition Support

Honeywell Total Connect® Partitions with Features End-Users Want

How would adding just one new Honeywell Total Connect partition account each month help your annual revenue? Honeywell Total Connect partition support helps you increase your attach rate and hardware sales, and target commercial customers, small offices, retail shops, and residential multi-dwelling homes. This feature offers remote control of security for up to eight VISTA® partitions from a PC or mobile device. Small business owners can globally arm, disarm, bypass sensors, or set up and assign users for select partition control. Event notifications and the ability to remotely disarm for select partitions are added benefits. Users also have the ability to view fire partition activity remotely. A universal fire partition may be programmed for all installed smokes in all the partitioned offices.

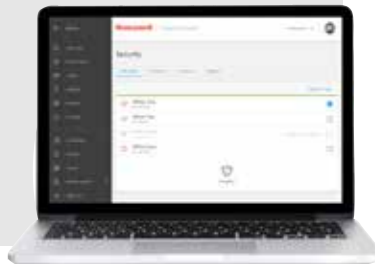

Grow Your Account Base with Easy Installs

Offering Honeywell Total Connect partition support gives you the opportunity to increase your Honeywell Total Connect attach rates and VISTA hardware sales. **If you were able to add an additional \$5.95-\$10.95* of Honeywell Total Connect RMR or additional alarm monitoring fees of \$5.00-\$10.00* for each partition, what would that do to your annual revenue?** For VISTA panels already programmed with partition support, you don't even need to roll a truck. For conversions, think about the additional hardware sale, plus new subscription sales. Start upgrading Honeywell Total Connect 1.0 accounts and start upselling all the additional 2.0 services.

**Rate is American dollars. These are merely examples based on customer feedback and vary depending on the territory and Honeywell Total Connect service package.*
